This is to inform you of the cancellation of the Title V permit for the facility cited above.

NRG Delta, LLC, Contra Costa Generating Station was subject to Title V because it operated two large boilers that had the potential to emit more than 100 tons per year of carbon monoxide and nitrogen oxides.

According to a letter dated August 30, 2013, from Michael Montany of NRG, those boilers were permanently taken out of service as of May 1, 2013. Therefore, the facility's potential to emit no longer exceeds any major source thresholds and is no longer subject to Title V permit requirements.

The cancellation of the Title V permit is effective as of the date of this letter.

If you have any questions regarding this matter, please call Dennis Jang, Senior Air Quality Engineer, at (415) 749-4707.

Sincerely yours,

Signed by Jim Karas, P.E. Jim Karas, P.E.

March 10, 2014
